- Antenna direzionale per la banda 430÷450 Mhz. Questo modello ha una larghezza di banda di 20 Mhz. Studiata per impieghi in zone con condizioni climatiche rigide, è realizzata con il supporto in acciaio inox ed il dipolo radiante in alluminio o in acciaio inox. Su richiesta è possibile inserire il radome a protezione dell'adattatore. Staffa di fissaggio in ferro zincato a caldo e bulloneria in acciaio inox. Tutta l'antenna è elettricamente a massa. Forte reiezione interferenziale sulle bande di frequenza adiacenti eliminando spesso l'inserimento di filtri aggiuntivi.
- Directional antenna for 430÷450 Mhz band. This model has a bandwidth of 20 Mhz. Designed for severe climatic conditions, it comes with a stainless-steel support and radiant dipole in aluminum or stainless steel. On request, it is possible to protect the adapter with a radome cover. The fixing clamp is made of hot galvanized iron and stainless-steel bolts. The whole antenna is electrically grounded. Strong interference rejection on adjacent frequency bands, often eliminating additional filters.
