

❖ **General description :**

The Selecom **Digirep®** single -band assures the coverage of radio cellular in the places or the infrastructures insufficiently covered (indoor or outdoor).

Its design and ease of implementation allows operation quality mobile or mobile phones used near the radio equipment without risk of saturation.

**Digirep®** is a last smart Selecom repeater, designed for an easy commissioning thanks to the automatic power setting. The remote control allows every configuration change of the equipment (frequencies, powers, filters...).
